**Jaster-Quintanilla/Dallas Announces Gifts to
Dwight Look College of Engineering at Texas A&M University;
First Graduate Fellowship in Sustainability for Civil Engineering Department**

Dallas, TX, May 6, 2008 – Jaster-Quintanilla (JQ)/Dallas has selected Texas A&M University's (TAMU) Dwight Look College of Engineering as the recipient of a five-year financial gift from the firm to help fund a graduate fellowship in sustainability within the Zachry Department of Civil Engineering. The graduate fellowship in sustainability is the first of its kind in the university's 132-year history. JQ is also funding a second fellowship that focuses on structural engineering.

According to Mr. Stephen H. Lucy, P.E., managing principal of JQ/Dallas, "We believe that higher education is the key to providing future civil engineers who are knowledgeable about sustainability. We selected Texas A&M because of our long-standing history of hiring graduates from the university and their demonstrated commitment to sustainability."

Says Mr. Lucy, "The College of Engineering is challenging each department to bring more sustainable topics into the curriculum, so the fellowship provides a timely incentive to focus on this goal." Texas A&M is Mr. Lucy's alma mater.

In March, Jaster-Quintanilla hosted a "Salute to Sustainable Design Education" and invited Texas colleges and universities, focused on sustainable curricula, to attend the event in Dallas. Among those attending were Texas A&M, Southern Methodist University, Rice University, the Dallas County Community College District and the University of North Texas. Jill Jordan, P.E., Assistant City Manager of the City of Dallas, presented Mr. Lucy with an official proclamation recognizing March 26th as a "Salute to Sustainable Design Education."

About The Dwight Look College of Engineering

The Dwight Look College of Engineering at Texas A&M University is one of the largest engineering colleges in the nation with nearly 9,000 students and 12 departments. Faculty includes seven university Distinguished Professors. Among the senior faculty are holders of 32 endowed chairs and 50 endowed professorships. Eighteen members of the faculty are members of the National Academy of Engineering.
